

The Studio

Robert Terradas Muntañola (Barcelona 1944) and Esteve Terradas Muntañola (Barcelona 1950) obtained their doctoral degrees in architecture at the Escuela Técnica Superior de Arquitectura de Barcelona (ETSAB) in 1968 and 1976, respectively.

Roberto has taught Projects since 1997 at the ETSAB. Moreover, he is Director of the Escuela de Ingeniería y Arquitectura La Salle in Barcelona. In turn, Esteban is Tenured Professor of ETSAB where he has been in charge of the Projects course since 1997, as well as being President of the Jury for the End-of-University Courses at ETSAB. Both have been working jointly for over thirty years and have ample experience in bringing to fruition large-scale projects related to cultural, sports, commercial, housing and office spaces, as well as in interior architecture.

Esteban and Roberto Terradas. Two architects, two brothers, two personalities, but a single way of understanding architecture. Entirely devoted to their work, Esteban and Roberto fully enjoy each project. Together they delve into each new challenge they encounter in their professional path enthusiastically, following the path they have chosen and that joins them. Both head the studio Terradas Arquitectos, working with a team of professionals that share their same passion for architecture. This team has executed extremely successful architectural projects with a work philosophy which applies research, creativity and conversation as paramount elements of the processes in project conception.

They have authored the creation or refurbishing of many important buildings such as the Barcelona Royal Shipyards, the CosmoCaixa Science Museum of Barcelona (finalist for the FAD Architecture Award 2005 and Best European Museum Award), the CosmoCaixa Science Museum of Madrid (Alcobendas), the Barcelona Aquarium, the Police School of Catalunya and the Olympic Shooting complex, the Fire-fighters School at Mollet, the Students' Hall of Residence at the Universitat Politècnica de Catalunya (UPC) and at the Escuela de Ingeniería y Arquitectura La Salle in Barcelona, among others.

Great works, all of them accomplished with the utmost professionalism and quality. They have been recognized in numerous publications and by way of various awards, such as the FAD Opinion Award in 1981 for the recovery and restoration of the Consulate Chamber of the Lonja, (market), dating back to the XVI century. In addition, they obtained the 1988 FAD Architecture Award for the Balmanya School and the prize Ciutat de Barcelona in 1997, which are among the many that underpin the development and success of their architectural studio.

1944 Born in Barcelona, Spain  
 1968 Architect. ETSAB  
 1968-70 Scholarship: Teacher training, Ministry of Education and Science  
 2008 Architect. PhD  
*Thesis: The Barcelona Royal Shipyards. Geometry, the design and the structure as guarantors of the building's identity*  
 Thesis director: Teresa Rovira Llobera

#### Teaching Experience

1997-now Director of the Architecture and Building Engineering School La Salle. Ramón Llull University. Barcelona  
 1995 Guest Professor at the "Fachhochschule Stuttgart", Stuttgart, Germany  
 1994 Guest Professor at the "Kungliga Tekniska Hogskolan". Stockholm, Sweden  
 Professor at the "Il Taller Internacional d'Arquitectura i Disseny". Canet de Mar, Barcelona  
 Member of the Associate Professors' Selection Committee, Universitat Politècnica de Catalunya  
 1976-96 Associate Professor, ETSAB - UPC  
 1972-75 Adjunct Professor of Projects III at the ETSAB. Universidad Politècnica de Catalunya  
 1971-97 In charge of the course Projects III at the ETSAB. Universidad Politècnica de Catalunya  
 1969 Professor at LAVAL University, Quebec, Canada

#### Juries, Curatorships

2012 International Architectural Competition "FUTURE", China  
 2009 Ideas competition. Preliminary design competition for the construction of several buildings in San Servera i Santanyi in Mallorca

Terradas Architects is made up of a team of professionals who are passionate about architecture. They work in teams collaborating on all stages of a project, from the initial ideas to the monitoring of the actual construction.

Terradas Architects collaborate with leading sector firms and individuals in order to carry out all the stages of a project. The most suitable partners are selected for each project based on requirements and abilities, participating in the design and construction process in search of excellence.
